

Reading: Course 1 overview

to the Google Data Analytics Certificate

Every day, the amount of data out there grows and grows. So the ability to interpret it effectively is more important than ever before. Data analytics is becoming one of the fastest-growing and most rewarding career choices in the world.

Currently, there are nearly 500,000 open jobs in data analytics, with a median entry-level salary of \$92,000 and a 20% annual growth rate [Source: Lightcast™ US Job Postings (2022: Jan. 1, 2022 - Dec. 31, 2022)]. Companies in all kinds of industries need qualified data analysts to solve problems and help make the best possible business decisions. And once you complete this program, you'll be prepared to make smart, strategic, data-driven recommendations for organizations of all kinds.

Throughout the courses in this program, you'll complete many assignments and projects based on both the practical activities and the day-to-day life of a data analyst. Along the way, you'll learn how to ask the right questions and understand objectives. You'll also discover how to effectively clean and organize large amounts of data to make it ready for high-quality analysis. On top of that, you'll gain experience using all kinds of tools and techniques that will help you recognize patterns and uncover relationships between data points. Further, to help you communicate the results of your analysis, you'll learn how to design visuals and dashboards. There's even an opportunity to create a case study, which you can highlight in your resume to demonstrate what you have learned to potential employers.

Program overview

The program consists of nine courses, including eight courses focused on data analysis and an additional course on using AI to accelerate your job search.

1. **Foundations: Data, Data, Everywhere** (this course)
2. **Ask Questions to Make Data-Driven Decisions**
3. **Prepare Data for Exploration**
4. **Process Data from Dirty to Clean**
5. **Analyze Data to Answer Questions**
6. **Share Data Through the Art of Visualization**
7. **Data Analysis with R Programming**
8. **Google Data Analytics Capstone: Complete a Case Study**
9. **Accelerate Your Job Search with AI**

Foundations: Data, Data, Everywhere is the first course in this program.

Course 1 content

Each course is broken into modules. Here's a quick overview of the skills you'll gain in each of the four Course 1 modules.

Module 1: Introducing data analytics and analytical thinking

Data helps us make decisions in both everyday life and in business. In this part of the course, you'll learn how data analysts use a variety of tools and skills to inform those decisions. You'll also get to know more about this course and the overall program expectations.

Module 2: The wonderful world of data

In this part of the course, you'll learn about the data life cycle and data analysis process. They are both relevant to your work in this program and on the job. You'll also be introduced to applications that help guide data through the data analysis process.

Module 3: Set up your toolbox

Spreadsheets, query languages, and data visualization tools are all a big part of a data analyst's job. In this part of the course, you'll learn the basic concepts to use them for data analysis. You'll also understand how they work through interesting examples.

Module 4: Become a fair and impactful data professional

In this part of the course, you'll examine different types of businesses and the jobs and tasks that analysts do for them. You'll also learn how a Google Data Analytics Certificate will help you meet many of the requirements for an analyst position with these organizations.

What to expect

Each module includes a series of lessons with many types of learning opportunities. These include:

- **Videos** for instructors to teach new concepts and demonstrate the use of tools
- **Step-by-step guides** you can use to follow along with instructors as they demonstrate tools
- **Readings** to explore topics more in-depth and build on the concepts from the videos
- **Practice quizzes** to prepare you for graded quizzes
- **Graded quizzes** to measure your progress and give you valuable feedback

This program was designed to let you work at your own pace—your personalized deadlines are just a guide. There is no penalty for late assignments. To earn your certificate, you simply need to complete all of the work.

Throughout the program, you'll be assessed with graded quizzes and activities. Both are based on the wide variety of learning materials and activities that reinforce the important skills you'll develop. And both can be taken more than once.

Congratulations on choosing to become part of the wonderful world of data analytics!
